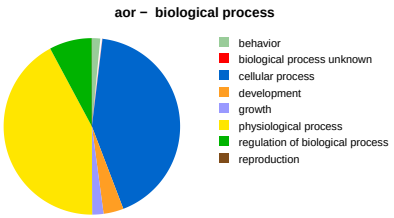
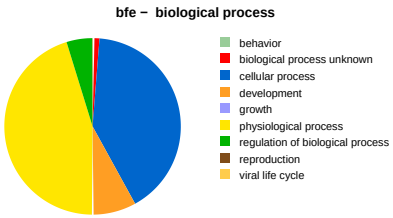
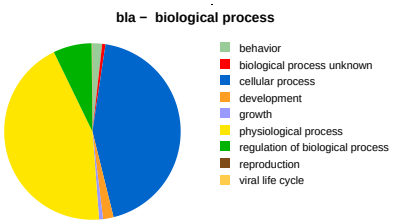
amn − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process



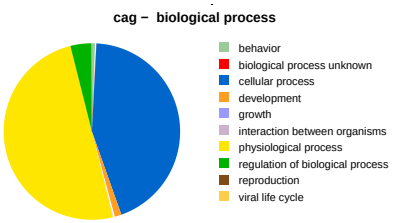
aor − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



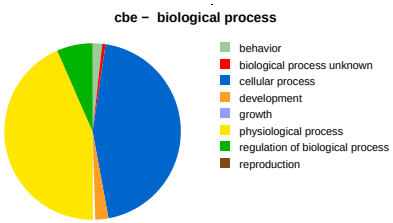
bfe − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction
viral life cycle



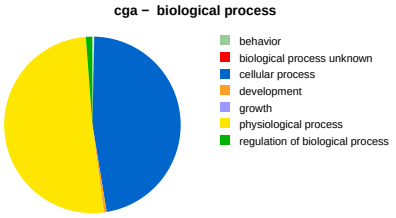
bla − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction
viral life cycle



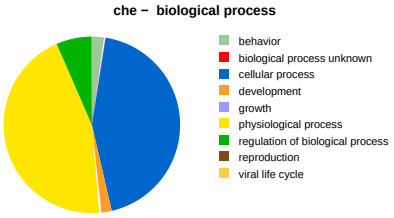
cag − biological process
behavior
biological process unknown
cellular process
development
growth
interaction between organisms
physiological process
regulation of biological process
reproduction
viral life cycle



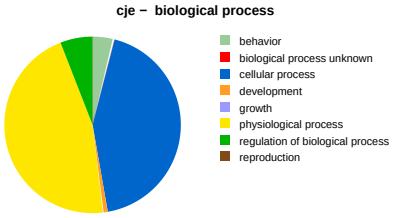
cbe − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



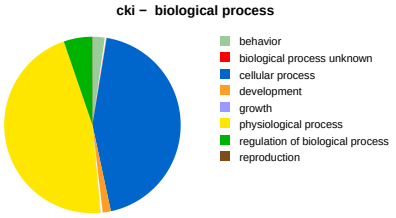
cga − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process



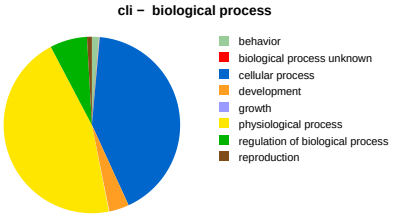
che − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction
viral life cycle



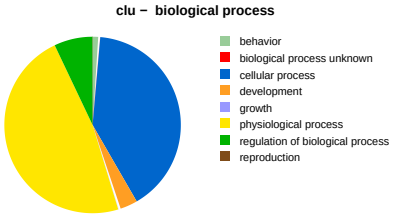
cje − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



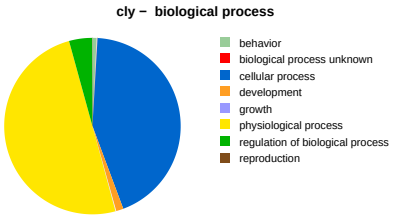
cki − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



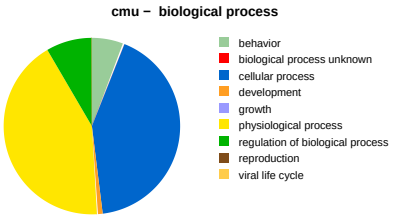
cli − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



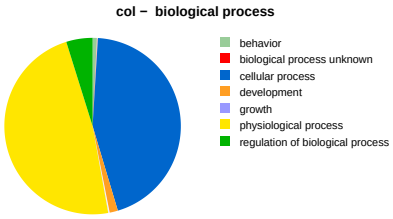
clu − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



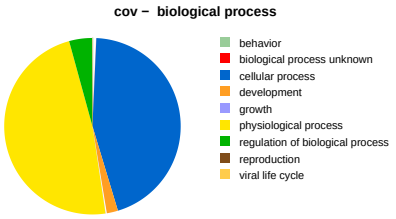
cly − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



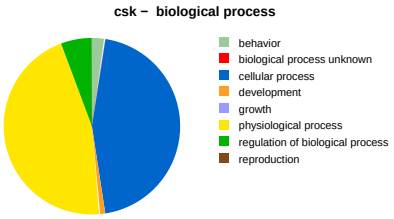
cmu − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction
viral life cycle



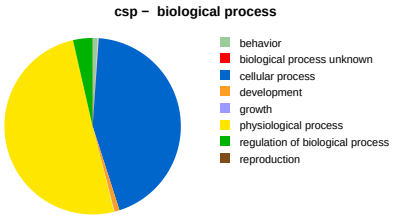
col − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process



cov − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction
viral life cycle

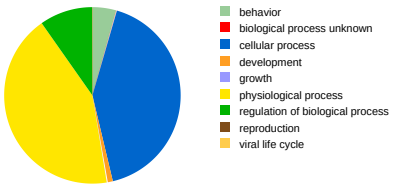


csk − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction

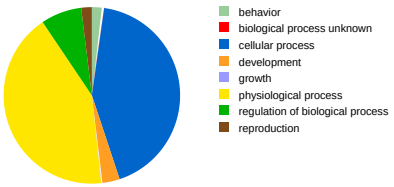


csp − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction

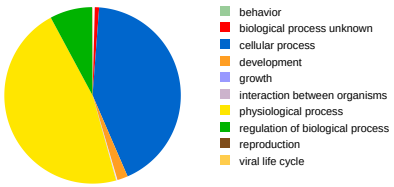
cst − biological process



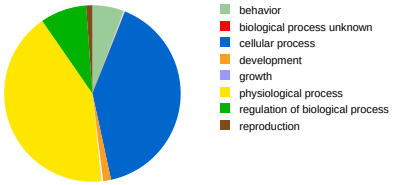
cte − biological process



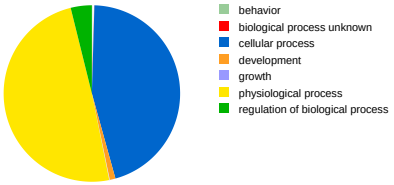
cty − biological process



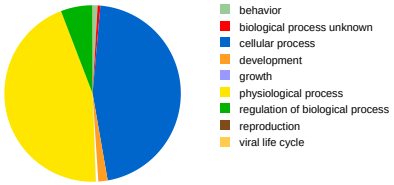
cut − biological process



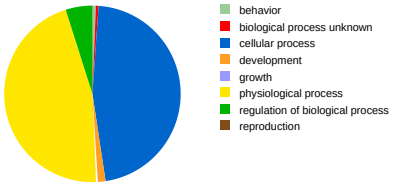
duo − biological process



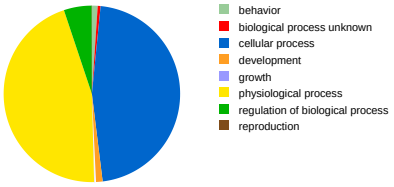
ebs − biological process



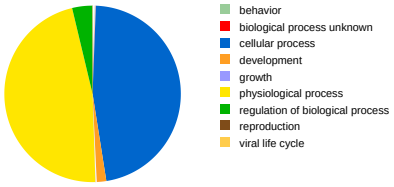
ecc − biological process



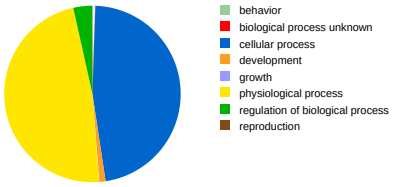
ece − biological process



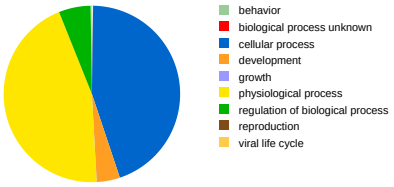
eep − biological process



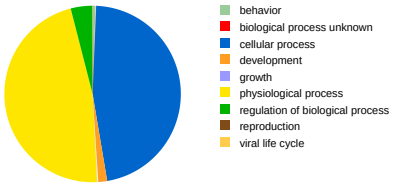
eje − biological process



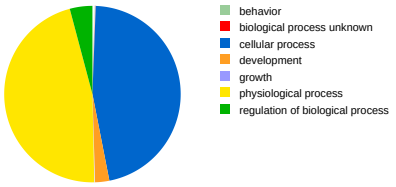
eli − biological process



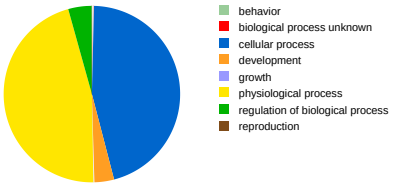
elu − biological process



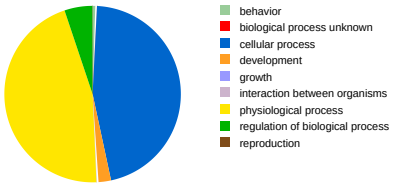
eru − biological process



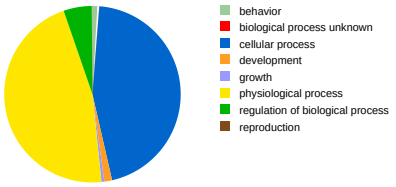
ese − biological process



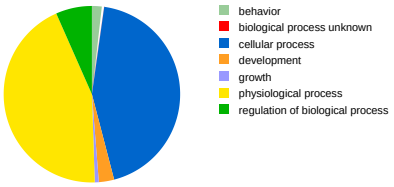
eye − biological process



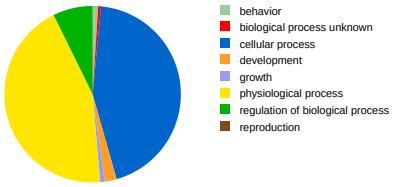
fat − biological process



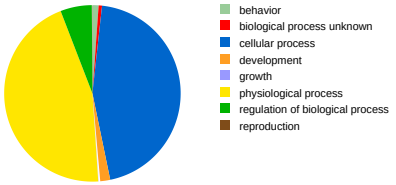
fbs − biological process



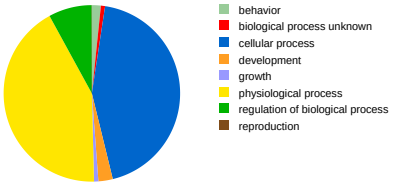
fcc − biological process



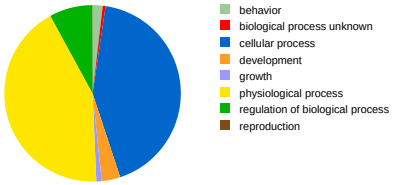
fce – biological process



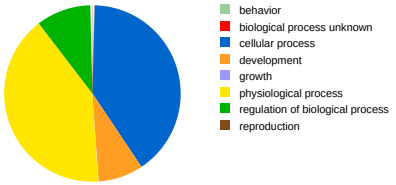
fco – biological process



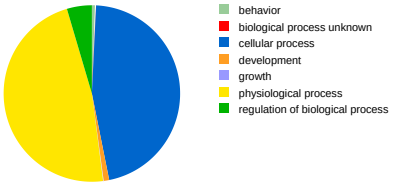
fhi – biological process



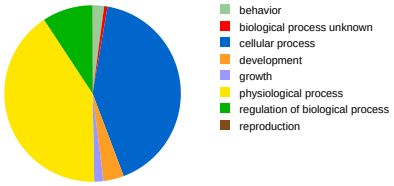
fli – biological process



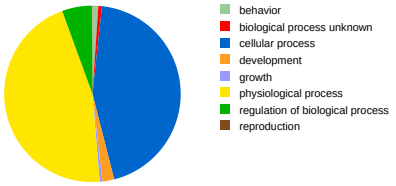
fty – biological process



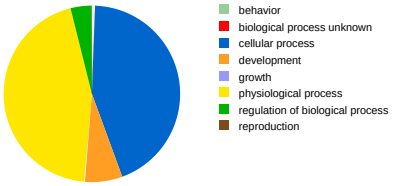
gul – biological process



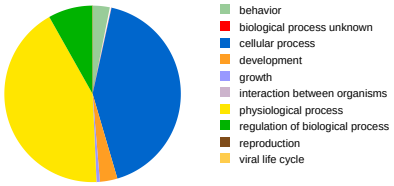
hea – biological process



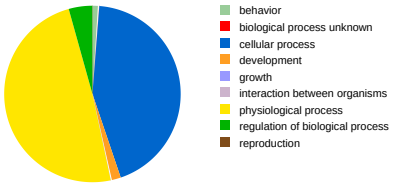
hlv – biological process



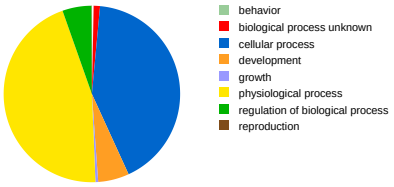
hyp – biological process



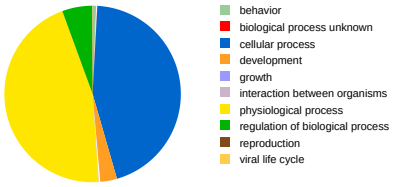
ill – biological process



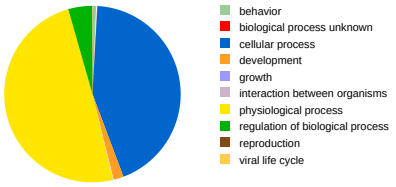
isp – biological process



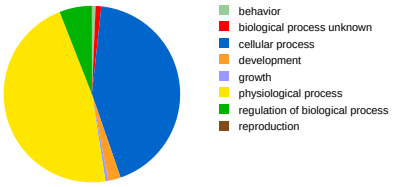
jca – biological process



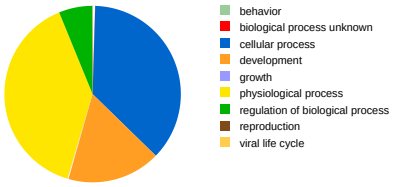
jej – biological process



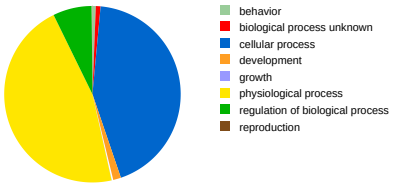
kid – biological process



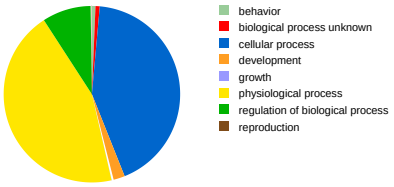
ldo – biological process



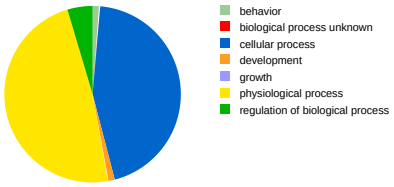
lin – biological process



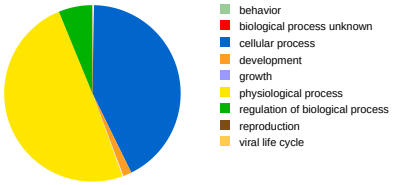
liv – biological process



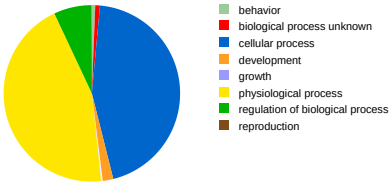
lnt – biological process



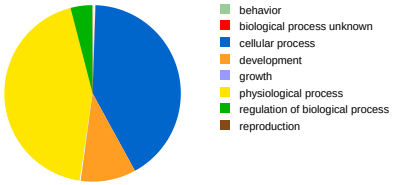
lun – biological process



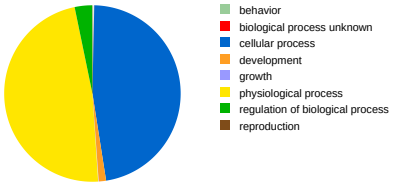
lyg – biological process



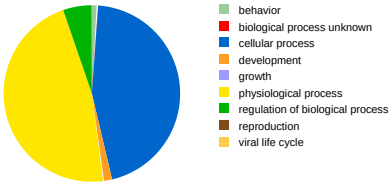
mas – biological process



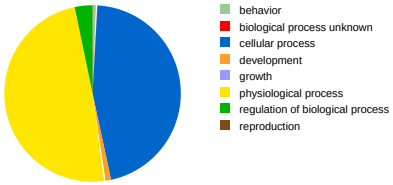
mcp – biological process



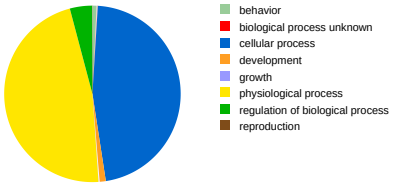
med – biological process



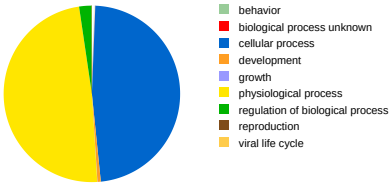
mga – biological process



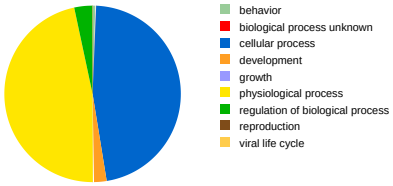
mgp – biological process



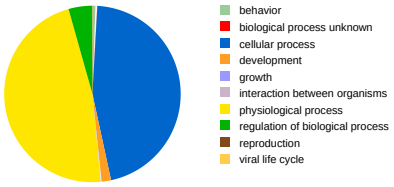
nbm – biological process



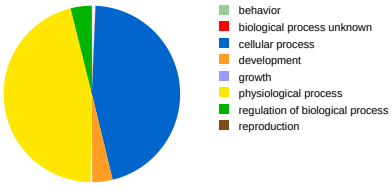
nca – biological process



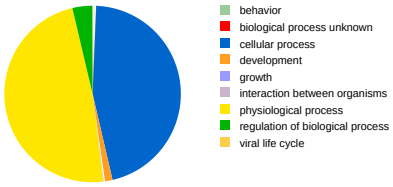
nco – biological process



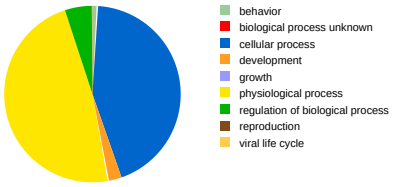
nep – biological process



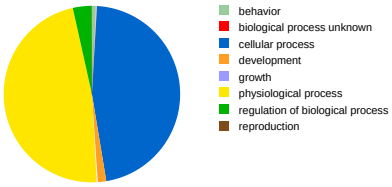
nje – biological process



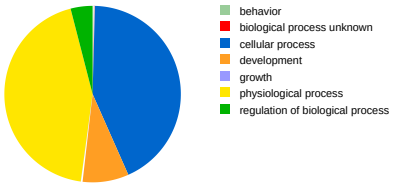
nlu – biological process



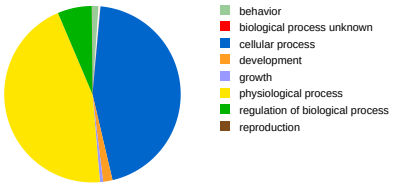
nmm – biological process



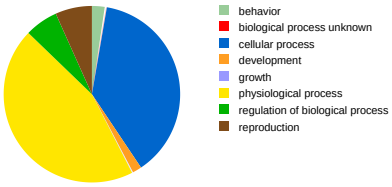
nms – biological process



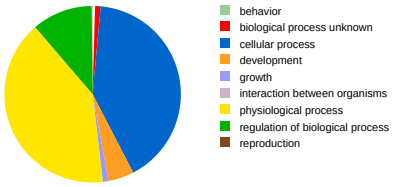
ova – biological process

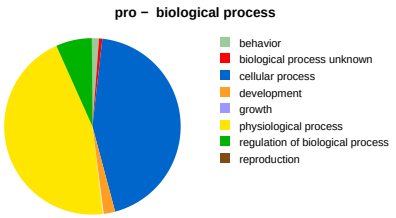


pgl – biological process

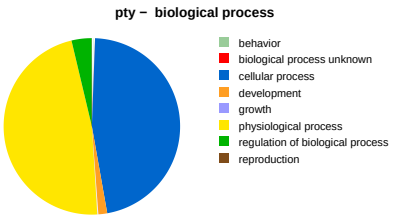


pla – biological process

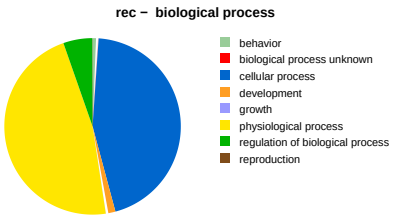




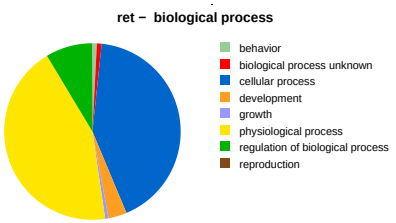
pro − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



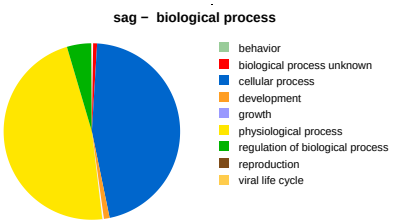
pty − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



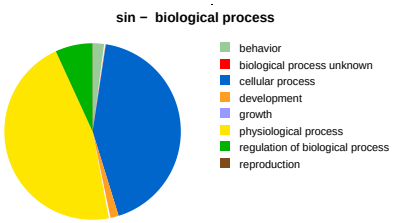
rec − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



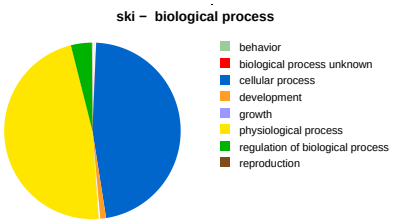
ret − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



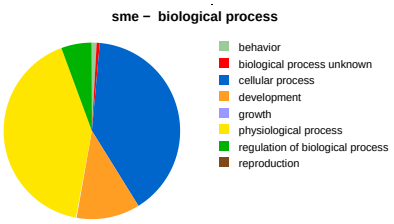
sag − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction
viral life cycle



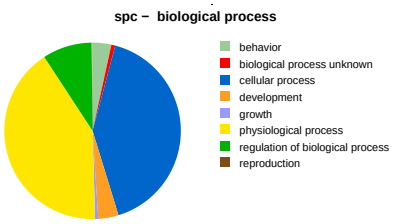
sin − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



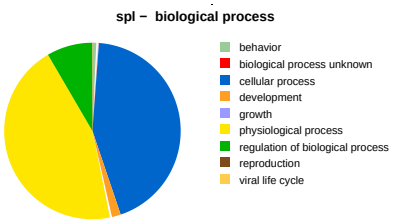
ski − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



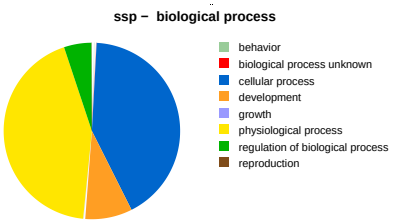
sme − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



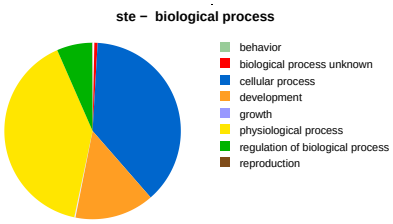
spc − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



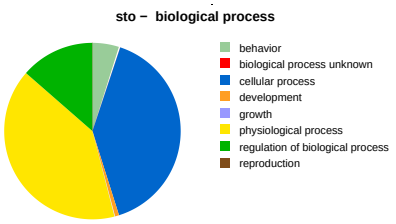
spl − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction
viral life cycle



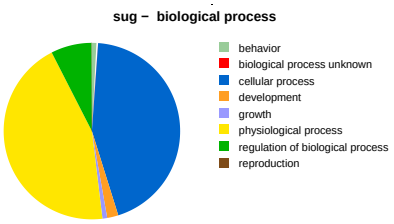
ssp − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



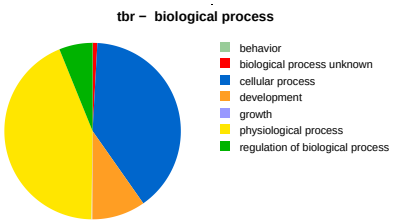
ste − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



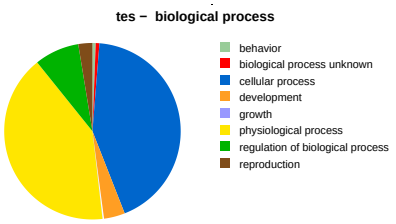
sto − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



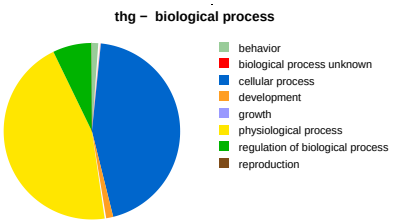
sug − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



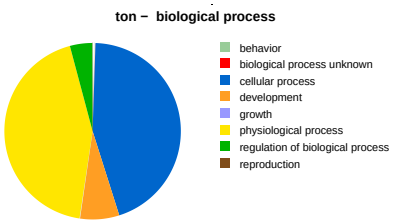
tbr − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process



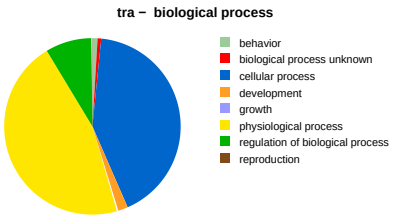
tes − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



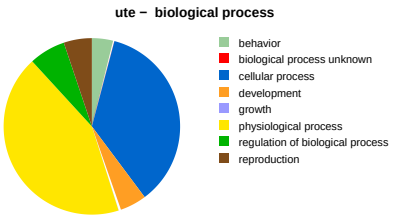
thg − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



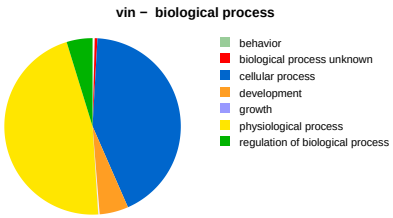
ton − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



tra − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



ute − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
reproduction



vin − biological process
behavior
biological process unknown
cellular process
development
growth
physiological process
regulation of biological process
