

Results for Ligands

Complete detailed summarised results for ACPYPE over 17900 ligands from PDB

The complete file with "Detailed atom report per entry" is [here](#)

```
& Symbol '&' (ampersand) means lines inserted manually in the
automatic generated report

& It was 8950 entries (ccpCodes), each possibly containing 2 mol2
entries, one from the PDB and another a IDEAL structure generated by
Corina. The max total of jobs would be 17900 and they took a combined
total time of execution of 2w 2d 7h 25m 14s in a computer
(mammoth.bio.cam.ac.uk) with 32 cores, but using only 20 cores at a
time.

& The cut off time of execution per job was 10h, i.e., any job lasting
more than 10h would be killed.

& Cut-off for minimum distance between atoms: 0.5 Ang.
& Cut-off for max distance between atoms: 3.0 Ang.

& It was used ACPYPE rev. 275 with AmberTools 1.3 using SQM instead of
MOPAC for aml bcc charges calculation. SQM here was modified to
include 6 decimals of precision instead of the default 3.

& From a total of 17900 jobs possible 13045 (72.88%) concluded without
any remarkable note. Nevertheless it doesn't mean they are corrected
of even acceptable.

& Total of missing input data and wrong coordinates: 318 + 107 + 96 +
68 + 9 + 7 + 4 + 28 + 219 + 16 + 3 = 875 jobs

& ACPYPE efficiency considering only valid jobs (17900 - 875 = 17025
valid jobs): 76.62% (13045 of 17025 jobs)

& >>> Time Job Execution Summary <<<

& Number of clean jobs: 13045
& Longest job: Mol='Rad_pdb', time= 9h 59m 46s
& Fatest job: Mol='Mmc_ideal', time= 0s
& Average time of execution per clean job: 14m 35s

& Total number of jobs: 17582 (318 simply didn't have the *.mol2 input
file, see below)
& Global average time of execution per job: 26m 17s

&&&& body of results with comments &&&&

& Results are grouped in 31 types, each type containing 3 divisions
(BOTH, PDB, IDEAL)

& This error below is indeed known and it's a problem with SQM in
Linux. This entry IUM has a Uranium atom and SQM should abort but
instead it proceeded.
```

UNKNOWN ERROR: /home/awd28/other/Ium/Ium.none_neutral.pdb.out ERROR:
The unperturbed charge of the unit: 10.815713 is not integral.
