

1/2 bucket (108) (chalk + rubbing)
removed
by clawing
back for photo.
dark greyish brown
blocky SILTY/CRAY

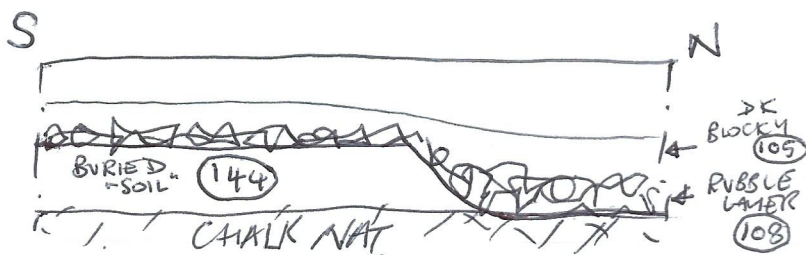

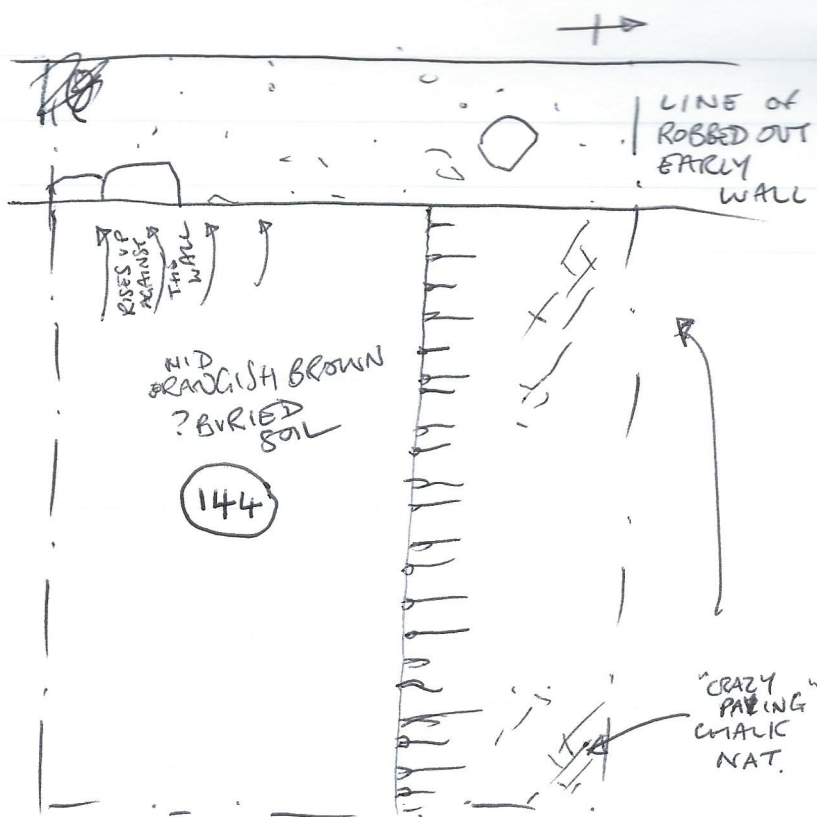

1 + 1/4 bucket (105)
yellowish
mid reddish brown
CRAY SILTY friable-ish
compact.

5% for chalk inclusions.

< 5 cm
charcoal + BC flecks

PEA GRIT at interface with (108)

Drenries (108), & X
deepest where that
layer slumps into top fill
of poss E-W ditch..

FINDS FROM (108) OCCURRED ONLY ABOVE THE INTERFACE WITH (144), WHICH SUGGESTS THEY ARE ACTUALLY FROM THAT LAYER... & THE INTERFACE WAS V. IRREGULAR.
