

**Reforming the scientific publishing system**  
**Open Access – Open Evaluation**  
(OA) (OE)

**Nikolaus Kriegeskorte**  
MRC Cognition and Brain Sciences Unit  
Cambridge, UK

# The four pillars of open science

## Open

- transparent
- usable by others
- efficient communication
- improved community checking
- better community cognition
- faster scientific progress

**sheep**

I want open access!

subscription fee

open access fee

page charges

**publisher**

OK!

I'm cold!  
Where is my  
wool?

# **A publication system needs to provide two functions**

**(1) access to papers**

**open access (OA)**

**(2) evaluation of papers**

**open evaluation (OE)**

# Open access (OA)

“Gold”

gold for the publishing industry

**Unnecessarily expensive.**

“Green”

just put it on the web

Harnad 1994

**Yes, but need guaranteed  
permanent accessibility  
and citability!**

# Digital object identifier (DOI)

digital [object identifier]

not [digital-object] identifier

# Digital object identifier (DOI)

*Getting a DOI and permanent archiving...*

- classical journals
- alternative publishing industry
  - figshare (free)
  - The Winnower (small charge)
  - ...
- ***preprint servers***

# OA with DOI: preprint servers

A free preprint service for the psychological sciences.

Powered by OSF Preprints

# Am I allowed to post preprints?

**Yes, definitely.**

- All major journals, including *Nature*, *Science*, and most high-impact field-specific journals, support the posting of preprints.
- Benefits for journals, too:
  - minimise errors in final published version
  - boost early citations and thus the journal's impact factor

# Sherpa Romeo website

<http://www.sherpa.ac.uk/romeo>

RoMEO Colour	Archiving policy
<a href="#">Green</a>	Can archive pre-print <i>and</i> post-print or publisher's version/PDF
<a href="#">Blue</a>	Can archive post-print (ie final draft post-refereeing) or publisher's version/PDF
<a href="#">Yellow</a>	Can archive pre-print (ie pre-refereeing)
<a href="#">White</a>	Archiving not formally supported

# Sherpa Romeo website

<http://www.sherpa.ac.uk/romeo>

**Journal:** [Nature](#) (ISSN: 0028-0836, EISSN: 1476-4687)

**RoMEO:** This is a RoMEO yellow journal

**Author's Pre-print:**  author **can** archive pre-print (ie pre-refereeing)

**Author's Post-print:**  **subject to Restrictions below**, author **can** archive post-print (ie final draft)

**Restrictions:**

- 6 months embargo

**Publisher's Version/PDF:**  author **cannot** archive publisher's version/PDF

**General Conditions:**

- Authors retain copyright
- Author's pre-print on arXiv or bioRxiv
- Author's post-print on author's personal website, institutional repository
- Published source must be acknowledged
- Must link to publisher version with DOI
- Publisher's version/PDF cannot be used

**Mandated OA:** Compliance data is available for [28 funders](#)

**Copyright:** [Pre-publication policy](#) - [License to Publish](#) - [Manuscript Deposition Service](#)

**Updated:** 08 Dec 2014 [Suggest an update for this record](#)

# Costs & benefits of preprint posting

## **costs**

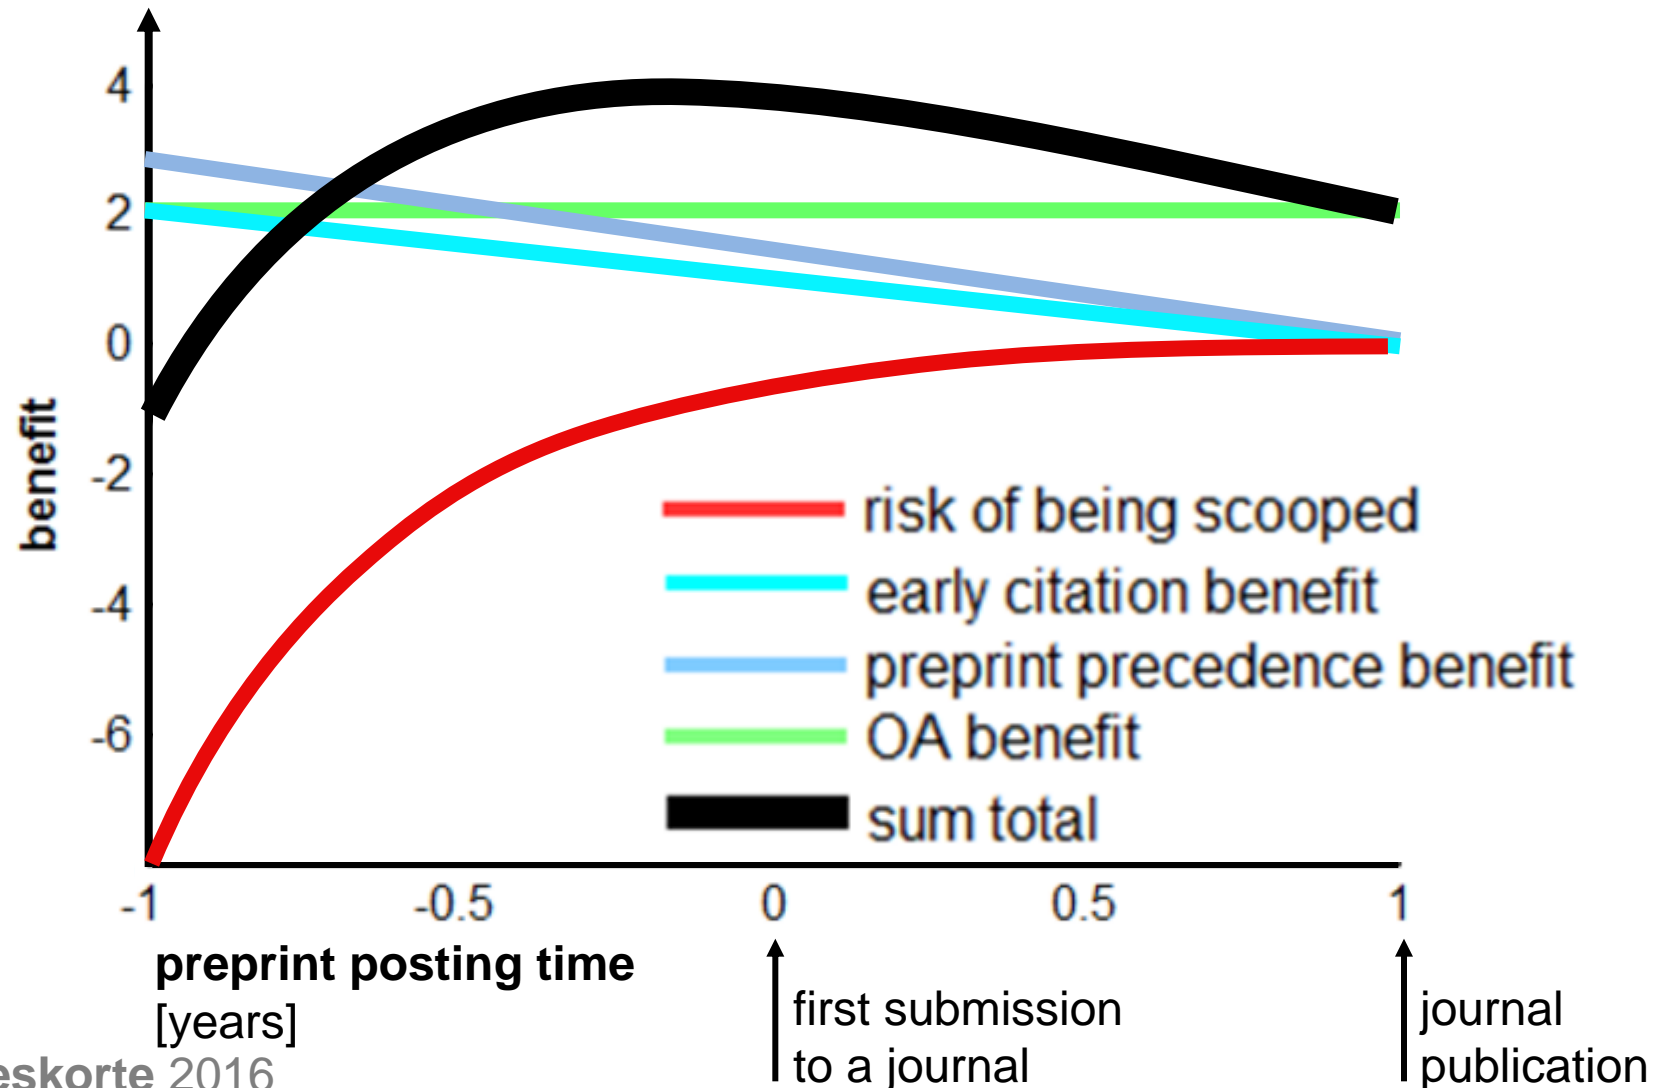

- **posting the preprint**  
( $<30$  min)
- **risk of getting scooped**

## **benefits**

- **open access**  
(instant & permanent, DOI)
- **errors caught**
- **earlier citation**
- **preprint precedence**

# Costs & benefits of preprint posting

as a function of time of posting

# Open evaluation (OE)

post-publication, evaluative responses  
from peers

- peer **reviews**
- peer **ratings**

→ ***explicit judgments***

(in contrast to article metrics like views, downloads, etc.)

→ ***signed or anonymous***

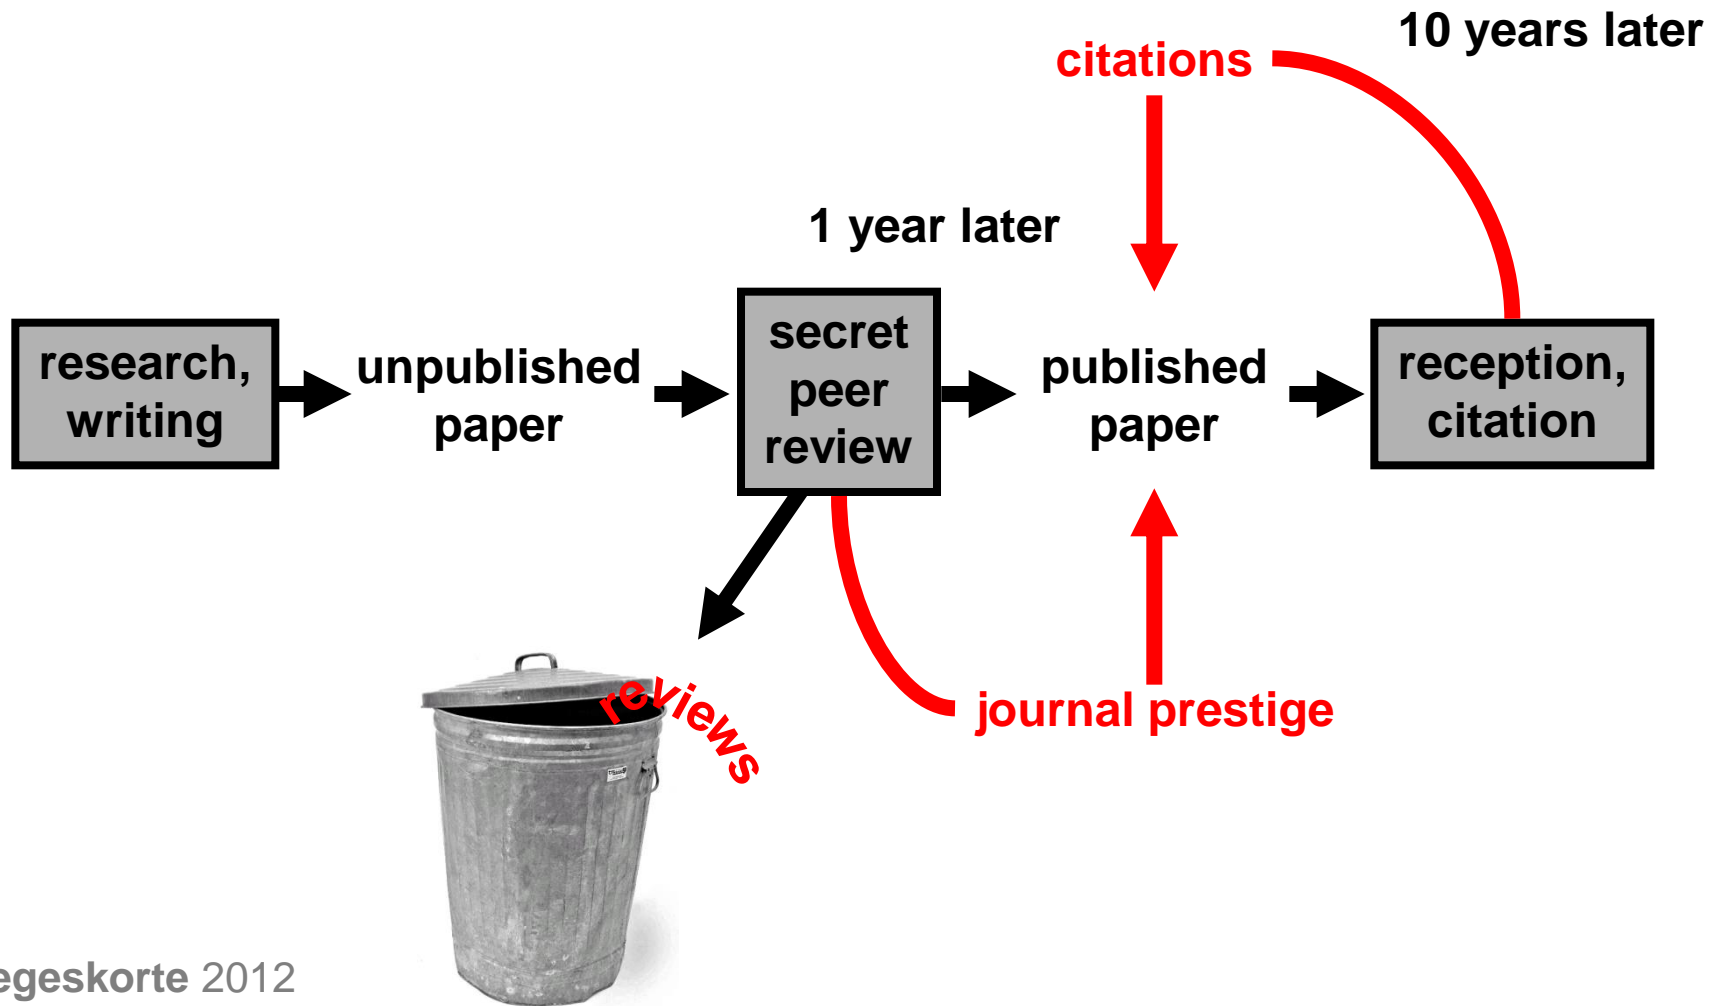

# ***Evaluation is the steering mechanism of science***

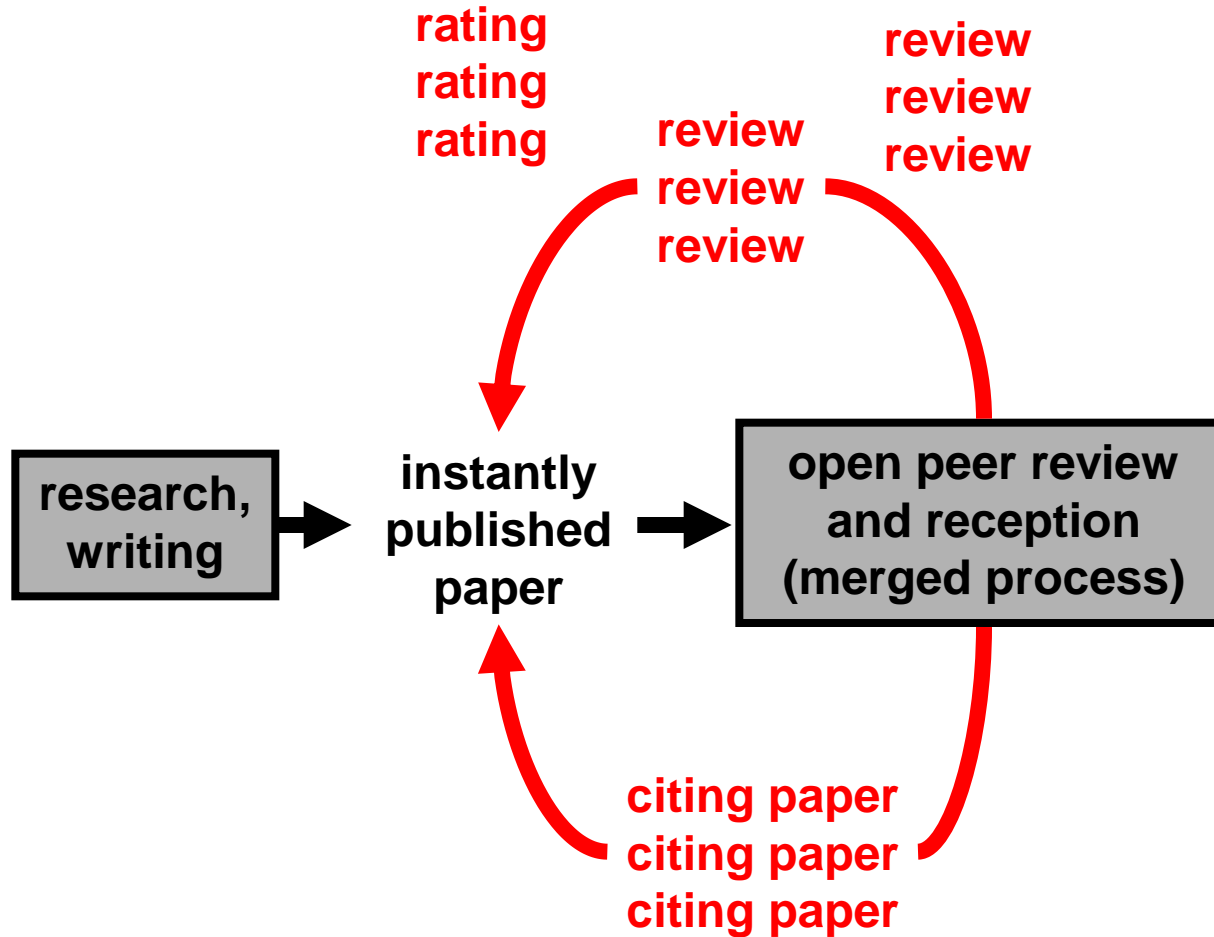

- steers the attention of scientists
- steers the direction of each field
- steers the progress of science
- steers public use of scientific results

***Designing the collective cognitive process of the scientific community!***

# Current

# Future

## *pre-publication review*

- ➔ publication delayed
- ➔ review process closed
- ➔ **evaluation compromised**
  - limited to chosen reviewers
  - no public scrutiny

## *post-publication review*

- ➔ publication instant
- ➔ review process open and transparent
- ➔ **evaluation reflects the field's deepest wisdom**
  - broader and deeper
  - all arguments heard
  - all arguments under public scrutiny

# The nature of a review

## Current

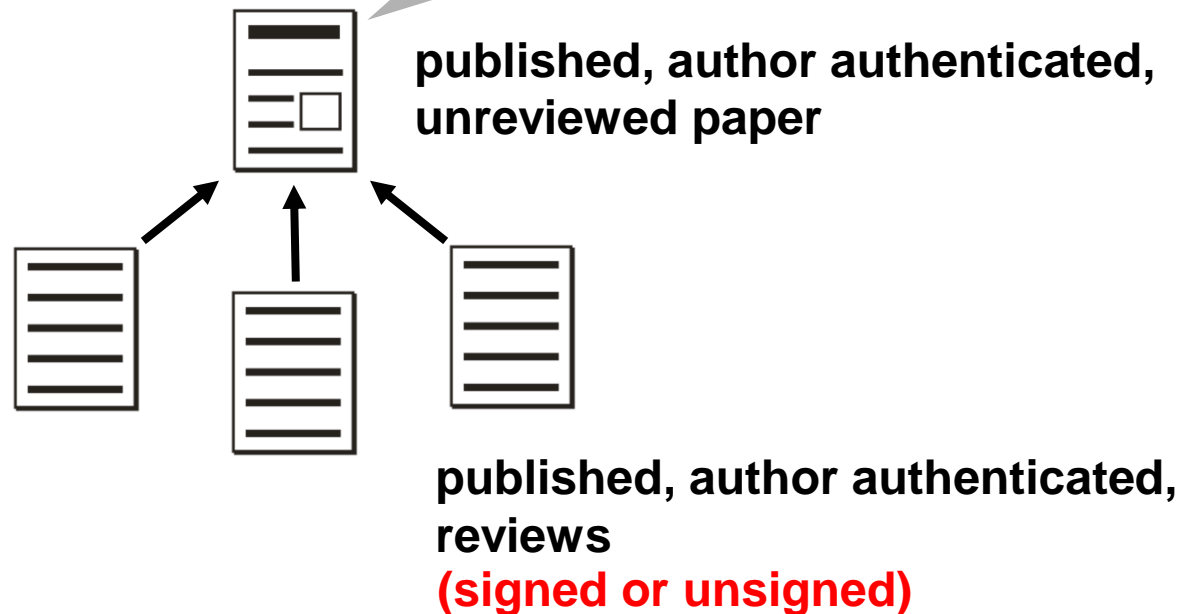

- secret communication to authors and editors
- decides about publication
- reviewer's motivation
  - selfless: scientific objectivity
  - selfish: science politics
- a weak argument can make or break a paper

## Future

- open letter to the community
- evaluates published work
- reviewer's motivation
  - selfless: scientific objectivity
  - selfish: looking smart and objective in public
- an argument is as powerful as it is compelling

## peer-to-peer editing

- authors ask a senior scientist to edit the paper
- editor chooses 3 reviewers and asks them to openly review the paper
- editor is named on the paper

## review

- text
- numerical ratings
  - justification of claims
  - importance
  - originality
  - ...

## peer-to-peer editing

- authors ask a senior scientist to edit the paper
- editor chooses 3 reviewers and asks them to openly review the paper
- editor is named on the paper

published, author authenticated,  
**reviewed** paper

paper score: 86 %ile

### paper evaluation function (PEF)

- arbitrary function that scores papers based on the available meta-information
- simplest case: weighted average of review ratings
- individuals or groups can define PEFs to prioritize the literature according to their needs

*justification of claims*

*importance*

*originality*

...

originality

# Consensus points of 18 visions for OE

- The evaluation process will be totally transparent.
- Anyone can define a formula for prioritizing papers, fostering a plurality of evaluative perspectives.
- The system heavily relies on signed evaluations.
- Reviews and reviewers are meta-evaluated.
- The open evaluation process is perpetually ongoing, such that promising papers are more deeply evaluated.
- Formal statistical inference is a key component of the evaluation process.

# Until we have the perfect platform...

- post preprints (***instant OA***)
- use blogs and social media to share opinions and peer reviews (***instant OE***)

**Create the culture of publishing you would like to see!**

# What I do

## OA

- post all our work on open-access preprint servers
- read and cite papers on preprint servers

## OE

- sign my reviews (all, including those leading to rejection of the paper)
- publish all my reviews on a blog as soon as I write them  
(I only review papers that are published as preprints!)
- write reviews as letters to the community
- title all reviews with the title the paper should have (TPSH)
- tweet with ratings about papers
