

Additional Figure S3: Path depletion leads to a reduction in NB size. (A-D) Control (A&B) and *path* knockdown (C&D) brains (*path-RNAi* driven by NB-specific *insc-Gal4*), larvae were incubated at 30°C for 5 days before dissection. Central brain dorsal (A&C) and VNC (B&D) brain NBs are marked with Dpn (red) and Mira (green). CB, central brain; OL, optic lobe. (E) Quantification of NB size with GFP-RNAi and *path-RNAi*. n=303, 340. ****p<0.0001. Scale bar, 50 μm .
